DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1,3-10,16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 fails to point out and distinctly claim Applicant's invention, as there is no clear structure recited in the claims which supports the functional language "may alternatively be configured to act as a master of a network or as a slave in a network." Correction is required.

Claim 16 fails to point out and distinctly claim Applicant's invention, as it is unclear as to what structure claimed, not recited in the specification, supports the phrase "is a lightweight portable hand-held device," as is recited for example in claim 7. Correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito (USPGP 2003/012401) in view of Sitrick (USP 6084168).

Ito (as applied in the previous Office Action) discloses a mixer apparatus, which comprises all features claimed, but does not explicitly disclose the configuring of the apparatus as either a master of a network or as a slave in a network.

With regard to Claims 1,3-10,17-20,25,26, Sitrick discloses a musical compositions communication system which comprises workstations 105 which can be configured as either a master of a network or as a slave in a network of workstations (Col. 9, lines 44-48; Col. 14, lines 48-63; Col. 16 lines 60-66; Col. 17 lines 3-12). It would have been obvious to one of ordinary skill in the art to adapt the teachings of Ito with those of Sitrick, so as to allow for different musicians to be able to shift control based on the circumstance or particular song being played, as is known in the art.

With regard to Claims 11-16,21-24,27-31, Applicant argues that Ito only teaches that one apparatus on the network has a mixer, as differentiated from the claimed invention, which recites that each musical device having a mixing mechanism. However, it would have been obvious to one of ordinary skill in the art to adapt the Ito/Sitrick combination so that each device would have a mixing mechanism, as it has been held that the mere duplication of working parts does not constitute nonobviousness (see M.P.E.P. 2144.04).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
